There is a limit on the total amount of benefit that people aged 16 to 64 can get. This is called the Benefit Cap. The main objective of the policy is to restrict the amount of welfare support a household can receive to reflect the average take-home pay of working households. In June 2016 the benefit cap was introduced at £26,000 a year for couples and households with children and £18,200 a year for single people without children. In November 2016 these thresholds were lowered to £20,000 and £13,400 respectively.

Main Stories
3,140 households have had their benefits capped from when the cap was introduced in June 2016 to January 2019.

1,320 households capped at January 2019.  
Average amount capped at January 2019.  
1,810 previously capped households no longer capped at January 2019.

1 There are a number of benefits which exempt households from having their total amount of benefit limited in this way. These exemptions are listed on page 2.
What You Need to Know

What is the Benefit Cap?
The Benefit Cap limits a working-age household’s benefit income to:
- £384.62 a week for couples (with or without children living with them) and single parents whose children live with them.
- £257.69 a week for single adults without children, or whose children do not live with them.

The cap applies to the combined income from benefits including:
- The main out-of-work benefits (Jobseeker’s Allowance, Income Support, and Employment and Support Allowance except when the Support Component is in payment):
  - Child Benefit;
  - Child Tax Credit;
  - Housing Benefit;
  - Universal Credit;
  - Other benefits such as Incapacity Benefit and Bereavement Allowance.

You are not affected by the cap if you or your partner are in work or in receipt of an exempt benefit.

Exemptions from the cap include:
- Carer’s Allowance
- Disability Living Allowance or its replacement Personal Independence Payment
- Employment and Support Allowance (support component)
- Working Tax Credit
- Other benefits such as Armed Forces Compensation Scheme payments
- Exemptions such as DLA/PIP also apply if received by other members of the household.

For most capped households the Benefit Cap is applied by reducing the amount of Housing Benefit they receive, so their total benefits no longer add up to more than the cap level. This report contains official statistics on these households.

The Benefit Cap can also be applied through Universal Credit (UC). Phased roll out of UC began on 27th September 2017 in Northern Ireland. There are currently less than 10 households capped through UC.

How is it measured?
The main source of Benefit Cap data is the Northern Ireland Housing Executive Housing Benefit data. Data on households who have (previously) been capped that are no longer capped is linked to the Department for Communities (DfC) benefits data to determine why households are no longer capped.

This report contains 3 measures:
- **Point-in-time caseload** counts the number of capped households each month.
- **Cumulative caseload** counts the overall number of unique households that have been capped from the introduction of the Benefit Cap to the latest month available.
- **Off-flows** is the difference between the two caseload figures, and shows the number of previously capped households no longer capped at the latest month available. It does not include households who have moved off the cap and back on through that period.
**Number of Capped Households**

The number of capped households at each month rose after the introduction of the £20,000 threshold in November 2016. The number of capped households reached a peak of 1,800 in April 2017. Since this time there has been a general decline in the number of capped households, and is now at its lowest level since the £20,000 threshold was introduced.

The Benefit Cap was introduced in June 2016 in Northern Ireland with a threshold of £26,000.

The £20,000 threshold was introduced in November 2016.

1,320 households had their Housing Benefit capped in January 2019.

The cumulative caseload of households that have had their Housing Benefit capped since the introduction of the Benefit Cap continued to rise over the last quarter to 3,140. This shows that new households continue to be capped.
Where Capped Households are Located

Belfast has the most capped households with 28% of the NI total (at January 2019) in the Belfast Local Government District (LGD).

More information

The Local Government District and NI Assembly Area reflects the initial areas in which the cap was applied to households.
62% (690) of single-parent capped households had at least one child under the age of 5.

At January 2019, 21% (280) of capped households had 5 or more children while 79% (1,050) had between 2 and 4 children. There were no capped households with 1 or no children at January 2019.

Child Benefit and Child Tax Credits are both included in the benefit cap, so families with more children, in receipt of higher amounts of these benefits are more likely to be capped.
Benefits Claimed by Capped Households

In January 2019:

- 22% of capped households were on Jobseekers Allowance (JSA).
- 9% were claiming Employment and Support Allowance (Assessment Stage and Work-Related Activity Group only) (ESA).
- 64% were claiming Income Support (IS).

Due to technical data transfer issues between DWP, HMRC and DfC we are currently unable to provide statistics on Tax Credits.

More Information

Capped households can be in receipt of multiple benefits. The Benefit Cap applies to a household’s combined income from a range of working age benefits. This means that a household can be included in multiple categories shown here and therefore percentages do not sum to 100%.

Analysis is based on benefit claims by the lead claimant in a household, and where applicable, their partner.
The Financial Impact of Being Capped

53% (700) of capped households were capped by £50 or less per week.

8% (110) of capped households were capped by more than £100 per week.

The average weekly impact of the Benefit Cap in Northern Ireland, during January 2019, is a reduction of:

£47
Moving Off the Cap

58% (1,810) of households that have previously been capped were no longer capped at January 2019.

More Information

Households may also become exempt if they made a successful claim for a disability-related exempting benefit such as Carer’s Allowance (CA), Disability Living Allowance (DLA) or Personal Independence Payment (PIP). 44% of households who have moved off the cap as at January 2019 were receiving disability-related exempting benefits.

It is difficult to track every other reason for claimants moving off the cap with the administrative data available. Many cases simply flow off the data and it is not possible to tell what changed in the household circumstances to cause this, as they are no longer on the administrative data.

However, some potential reasons could include: cases moving to different accommodation leading to a change in Housing Benefit award size, a child leaving or joining a household causing benefits to be re-calculated, a partner leaving or joining a household causing benefits to be re-calculated and any other change of circumstance that leads to the benefit income of the household reducing below the cap threshold.

Off-Flows From the Cap by Household Outcome, at January 2019.

44% of households moving off the cap moved into disability-related exempting benefits

Other - including: reduction in HB, no longer in receipt of HB, moving into work, and changes to household structure

Disability-related exempting benefits - including carer’s allowance and PIP

More Information

The reason a household is no longer capped may change after a household has moved off the cap. This chart shows this reason as at January 2019. There may be a number of reasons why a household is no longer capped but only a single reason is shown.

If a claimant moves into work and receives Working Tax Credit (WTC) they become exempt from the cap. This is one of the main reasons in Great Britain for cases flowing off the cap. However in Northern Ireland the majority of claimants are receiving mitigation payments under the Fresh Start Agreement which make up for the reduction in Housing Benefit due to the application of the Benefit Cap, so the same financial incentive to enter work does not exist.

The NI Executive committed to delivering welfare mitigation payments, which will run until 31 March 2020, for eligible claimants as detailed in the Fresh Start Agreement. All eligible claimants who are continuously affected by the Benefit Cap will receive a mitigation payment until 31 March 2020.

Due to technical data transfer issues between DWP, HMRC and DfC we are currently unable to provide statistics on Tax Credits.
About These Statistics

The Benefit Cap was introduced in Northern Ireland on 31st May 2016 at the £26,000 per annum threshold for couples and households with children and £18,200 per annum for single people without children. On 7th November 2016 these thresholds were lowered to £20,000 per annum and £13,400 per annum respectively.

This summary contains experimental statistics on the number of households capped since the introduction of the Benefit Cap. It examines key features of these households in terms of amount capped, number of children and family type broken down by local government district and assembly area. The benefits claimed by capped households and the destination of off-flows from the Benefit Cap have also been examined.

The main source of Benefit Cap data published here is the NIHE Single Housing Benefit Extract (SHBE). This is merged with DfC benefit scans to give data on the types of benefits claimed by capped households and also the age and number of dependents. SHBE is merged with DfC benefit scans to provide information on the outcomes of households that have off-flowed from the Benefit Cap. The Benefit Cap is currently administered through a reduction in Housing Benefit. Future administration of the Cap will also occur through a reduction of Universal Credit payments as the roll-out of the Universal Credit policy is extended to eligible households throughout Northern Ireland. At January 2019, there was no households capped through Universal Credit.

Data Quality Statement

These statistics are in an experimental stage and as such are subject to retrospective revision in any future releases.

The methodology for gathering these statistics is still in development and is also in the process of being quality assured. The methodology may change, leading to a revision of the figures contained within.

Definitions

Point-in-Time Caseload: The number of households capped at each month from the introduction of the Benefit Cap (on 31 May 2016) to January 2019.

Off-Flows by Outcome: The number of households who have previously been capped but are no longer subject to the cap in January 2019.
